

Monitoring

Self monitoring

Self monitoring of the alarm system is possible by using the integrated speech dialler. Essentially a DTMF dialler that can be easily programmed to dial up to six numbers either after an alarm event or upon manual request from the system user. When a call is received from the system the answering party can enter a pre-agreed code which opens two way speech communication via the panel's on board speaker and microphone, particularly useful if the system is used as an emergency contact system for the elderly or infirm.

Professional 24 hour monitoring

Unfortunately an alarm siren will not always have the desired effect of summoning assistance so Prime offers an alternative. Setting up an account with a dedicated 24 hour monitoring service will ensure an immediate response to an alarm event. Prime is able to communicate with most professional central monitoring stations in SIA and Contact ID protocols. Some monitoring services will also be able to take advantage of Prime's two way full duplex audio capability.

INFP-GSM – Mobile phone connection (optional)

The INFP-GSM module fits neatly inside the main Prime panel.

Once fitted with a suitable GSM Sim card virtually all communication functionality of the system can be carried out via the GSM network. Ideal for locations where a fixed land line is unavailable. The INFP-GSM also enables Prime to send alerts, receive instructions and even control home automation devices using SMS.

Home automation (optional)

Prime embraces x-10 technology via the INFP-HA home automation module. Up to 16 x 240v devices around the home can be automatically controlled to activate or deactivate at preset times or on demand with no extra complicated wiring required. An x-10 receiver is introduced between the appliance plug and it's normally used socket allowing Prime to "talk" directly to the appliance via the 240v mains ring. The appliance can then be switched on and off using the Prime panel itself or by a pre-set schedule programme, ideal for giving an impression of activity when the property is unattended.

A selection of fully expandable starter packs

**INFP-KIT
Prime Kit**
1 x Prime Panel
3 x Animal Immune
Motion Detectors
1 x Magnetic Switch
1 x Multi-function Keyfob
GSM module version
available **INFP-KITGSM**

**INFP-KITWES
Prime Kit with sounder**
1 x Prime Panel
3 x Animal Immune
Motion Detectors
1 x Magnetic Switch
1 x Multi-function Keyfob
1 x Wirefree External Sounder
GSM module version
available **INFP-KITWESGSM**

EVERYDAY
SECURITY

prime

Wirefree home security and management system

Prime offers the professional installer a comprehensive and reliable intruder alarm solution that can be fitted with ease and minimum disruption to the customer's property. Secure transmission methods, long battery life and superbly designed detection accessories enable the installation of Prime to be trouble free and more importantly wire free!

Whilst the primary role of Prime is that of a highly secure intruder alarm, it's full capabilities can offer the end user many functions that at last combine protecting the property with helpful features that will be used every day.

Prime is easily expandable by a series of plug-in modules that allow the end user to enjoy the full benefits of the system.

Prime can be installed to BS-EN50131:2006 Grade 2 Class 2.

Main Prime features

- Integral speech dialler
- Integral digital communicator
- Remote set/unset using standard phone
- Audible message memopad
- Voice indication of set/partset/unset
- No-motion zone type available
- Upload/download via PSTN or local USB
- Attractive Cool Blue display

Prime Main Control Panel

- 32 wirefree zones
- 19 wirefree keyfobs
- 4 wirefree keypads
- 32 user codes
- 256 event log with time/date stamp
- Integral PSTN communicator
- Speech dialler and Digicom functions
- Remote set/unset using standard phones
- Audible message memopad
- Voice indication of set/partset/unset
- USB for local upload/download
- Full, Part, and Perimeter setting modes—with separate entry/exit delays and set/unset tones
- Full upload/download via PSTN (FOC software available)
- Built-in LCD (2 row x 16 character) with user-friendly menu-driven interface
- Custom end-user descriptors for each user, zone, HA device and SMS message
- Custom system banner
- Built-in siren
- Built-in two-way-audio including one-touch service call button
- Installer friendly utilities – transmitter signal strength, smart walk test, transmitter status list, remote transmitter deletion
- European standard 868MHz

INF-RKP

Wirefree Keypad

- Numeric keypad
- Remote control of 16 home automation devices
- One-touch full/part/perimeter set
- Panic alarm function

INFP-CO

Carbon Monoxide Detector

- 3 way LED status indication
- Detector test function
- Alarm hush function
- Quick release back plate
- Internal 85db siren

INF-GAS

Gas Detector

- Detects Butane, Propane and Methane (natural gas)
- 85 dB siren output
- Fully supervised device
- Test button and continuous self-testing function
- 220V AC

INF-REPEATER

Range Extender

- Extends the range between control panel and wirefree detection sensors
- Ideal for problematic reception areas; attics, basements and cellars
- NB Requires installer keypad for setup order code **INF-PROGKP**

INF-MFB

Multifunction Keyfob

- Compact, sleek design
- 4 buttons, 5 functions (3 set modes, unset, Home Automation on/off, Panic)
- LED transmission indication
- Triple randomized transmission
- Fixed transmission time guards against battery drainage

INF-FLOOD

Flood Detector

- Provides early warning of flooding or water leakage
- 30-second delay to prevent false alarms caused by humidity or condensation
- Triple randomized transmission
- Lithium battery powered with low current consumption (10µA standby)

INF-PANIC

Panic Button

- Water resistant
- Pendant/Keychain option
- Aesthetic design
- LED transmission indication
- Fixed transmission time guards against battery drainage

INF-AMS

Auxiliary Microphone Speaker

- Used instead of or as well as the Prime on board microphone & speaker
- Hard wire connection to Prime panel
- Full duplex high quality sound
- LED indication

INF-SMOKE

Smoke Detector

- Ceiling mount
- No radiation emission
- Data transmission: alarm, restore, low battery and supervision
- Uses two 3V lithium batteries
- Complies with EN54-7

INF-WSM

Wirefree External Siren Module

- Provides full power requirements and a secure wirefree connection for virtually any external hardware siren assembly.
- Compatible with virtually all wired external sounders
- 13.8vdc output
- Plug in power supply
- 12vdc back up battery

INF-WES

Wirefree External Siren

- 108db high frequency siren
- Audible "system set" function
- High visibility strobe
- Front and rear tampered
- c/w 12vdc power supply
- NB Wirefree Sounder Module not required

INFP-SHOCK

Shock Sensor

- Ideal for window frames or walls
- Self analysis to avoid false alarms
- Compact design
- Tamper proof

INF-GLASS

Glass-break Detector

- Acoustic glass-break detector
- 6m radius coverage with automatic test for easy installation
- End user 'hand clap' sensor verification
- Superior detection and immunity to false alarms
- Recognizes actual pattern of breaking glass across full audio band - detects through blinds & curtains.
- Lithium battery powered with low current consumption (10µA standby)

INF-PIR

Motion Detector

- 14m x 14m/46' x 46' coverage
- Lithium battery powered with very low current consumption (6µA standby)
- Adaptive temperature compensation
- Selectable pulse count and LED indicator
- Superior RFI/EMI immunity
- Dual randomised transmission
- Front and rear tamper facility

INF-PET

Animal Immune Motion Detector

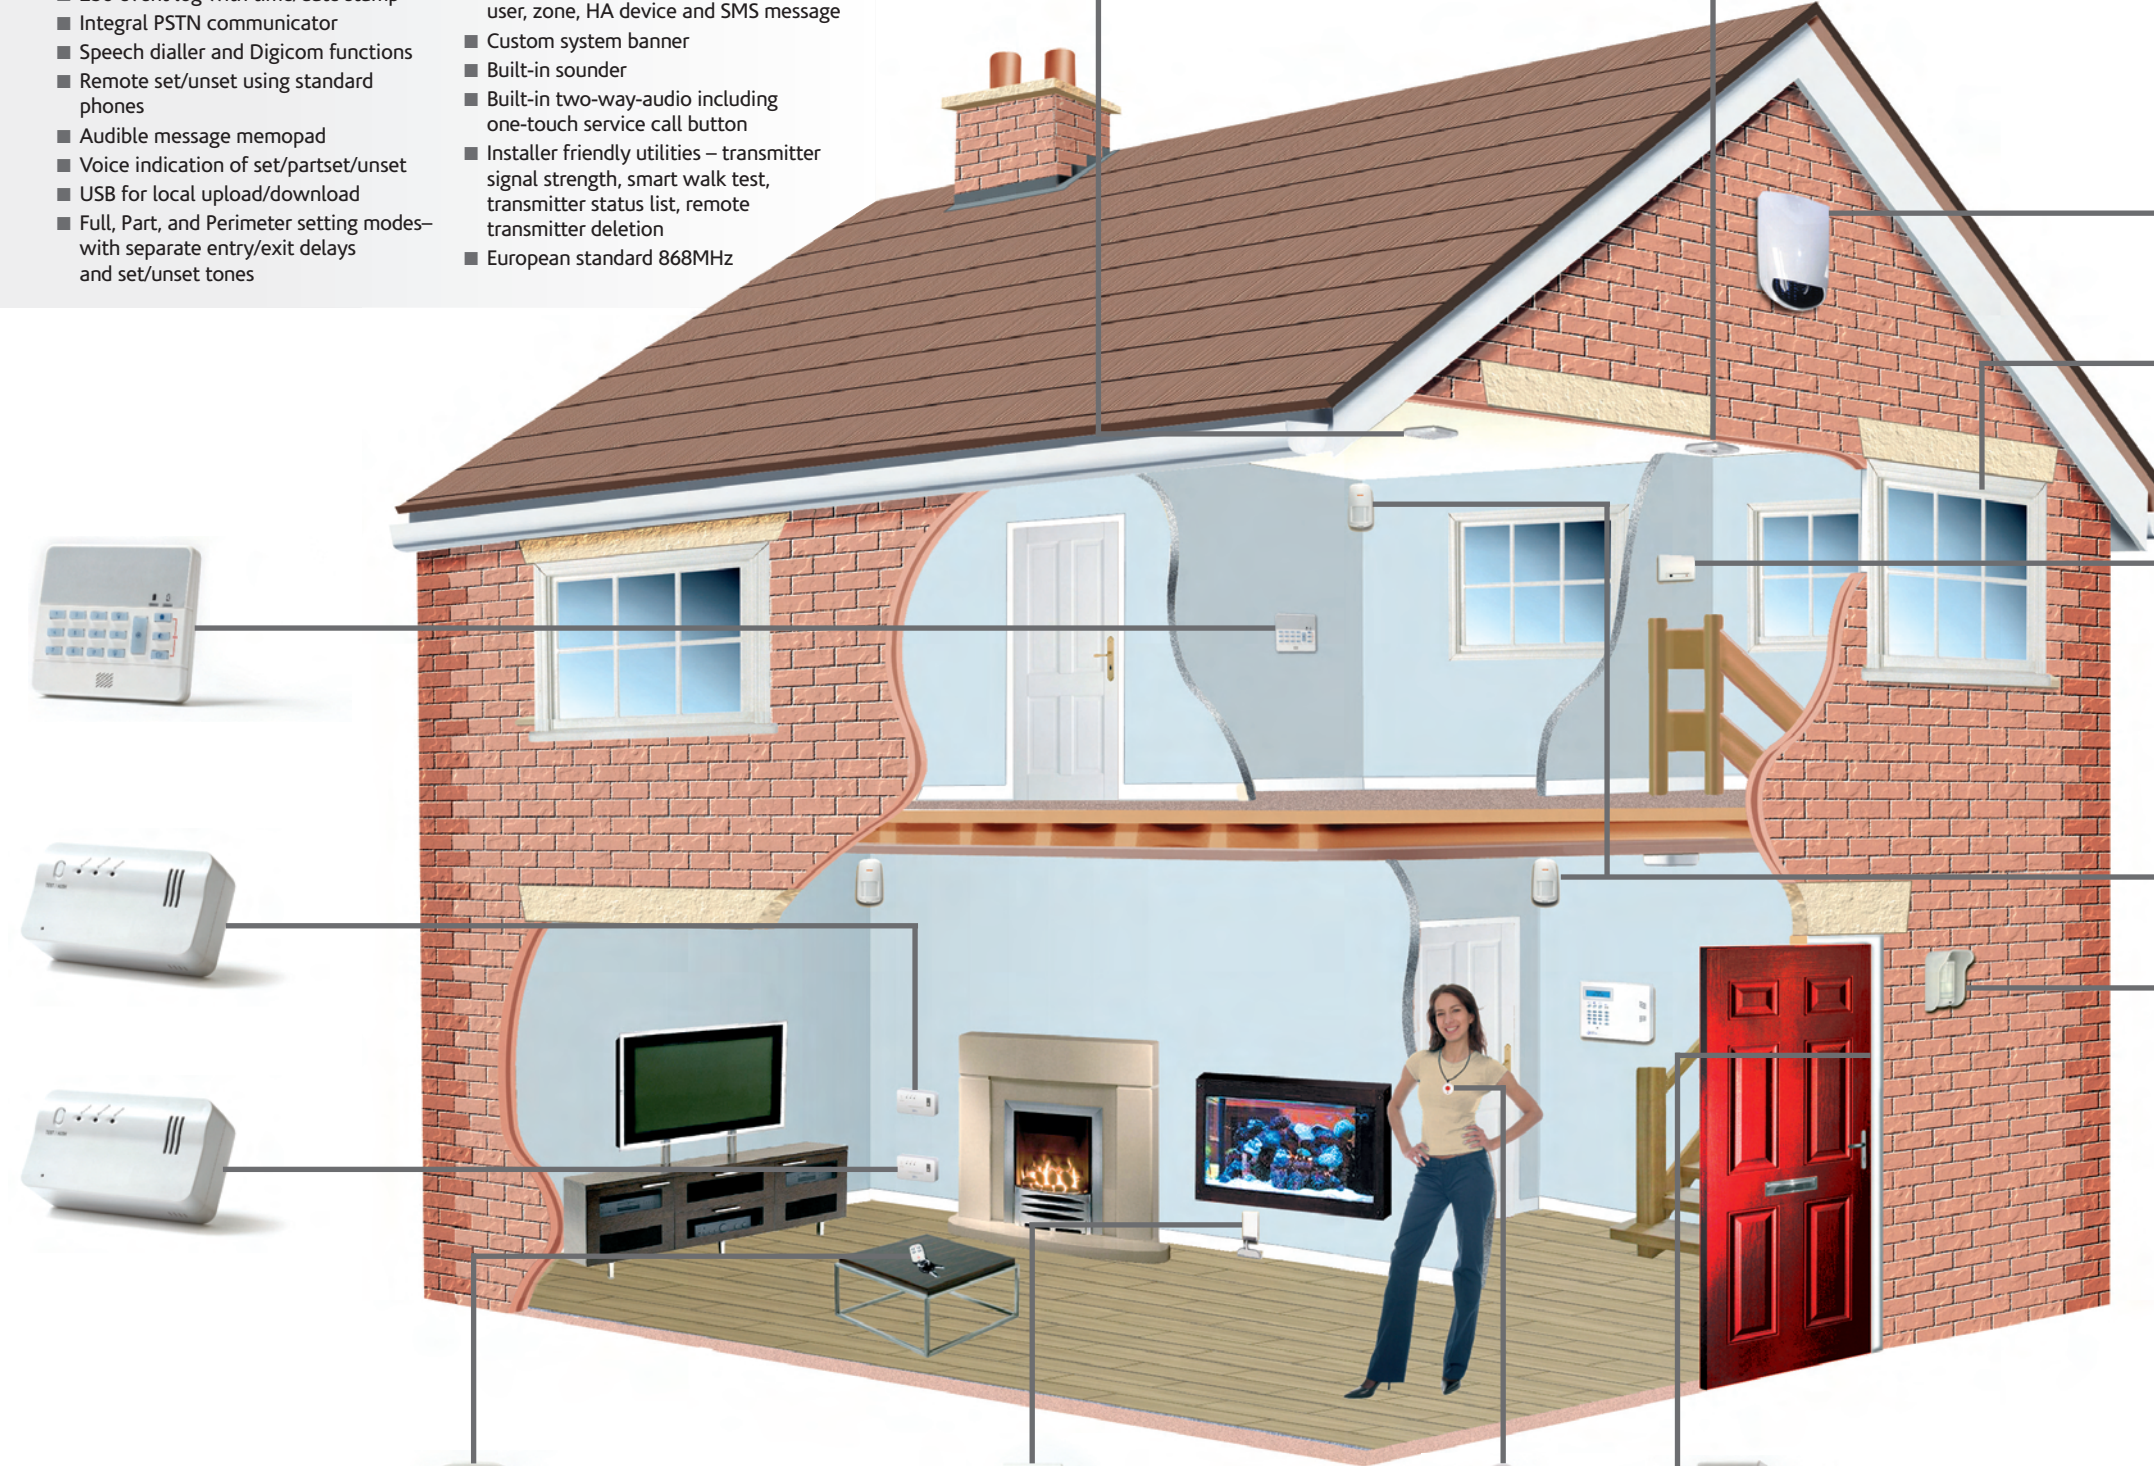

- 12m x 12m/39' x 39' coverage
- ASIC-based
- 23kg/50lb. Full Area Vision pet immunity
- Lithium battery powered with very low current consumption (6µA standby)
- Adaptive temperature compensation
- Selectable pulse count and LED indicator
- Superior RFI/EMI immunity
- Dual randomised transmission
- Front and rear tamper facility

INF-PIREXT

Exterior Animal Immune Motion Detector

- Suitable for external use
- Short range 5m to avoid nuisance alarms
- Animal immune

INF-MAG

Magnetic Switch

- Compact, aesthetic design
- Wired alarm input
- Lithium battery powered with very low current consumption (7µA standby)

INF-UTX

Universal Transmitter

- Connects hard wire equipment to Prime
- Long life Lithium battery
- Compact design
